

2009 formulary guide includes generic and brand-name medications

September 2009

Dear Member,

This booklet includes the **Formulary Guide** and gives you easy to understand information about your prescription drug coverage.

The medications listed have been approved by the Food and Drug Administration as safe and effective. We continually review and update our formulary.

If you have questions or need additional information, please visit our Web site or contact the FLRx Pharmacy Help Desk at (800) 724-5033.

univeracommunityhealth.org

Please see your plan documents for a complete description of your pharmacy benefit.

The FLRx logo on your insurance identification card means that you have prescription drug coverage through our health plan.

what is a formulary?

A drug formulary is a list of prescription drugs that are covered by your health plan.

All generic drugs and brand name drugs listed on the formulary are covered.

If your doctor writes a prescription for one of the drugs listed on the formulary, you can go directly to your pharmacy to have your prescription filled.

If your doctor writes a prescription for a drug that is not listed on the formulary, it is considered "non-formulary." Non-formulary drugs are generally not covered. They may be covered if your doctor shows that you meet the medical guidelines for the drug and gets approval before you get your prescription filled.

how do I use the formulary?

The formulary lists covered generic and brand-name drugs. There are two ways to find your drug within the formulary:

medical condition

Drugs are listed in alphabetical order according to drug categories. For example, drugs used to treat heart conditions are listed under the category "Cardiovascular / Heart." Drugs are listed in alphabetical order by condition.

alphabetical listing

If you are not sure what category to look under, look for the name of your drug in the Index that follows the formulary. The Index lists drugs in alphabetical order and the page where they can be found in the formulary.

can the formulary change?

Yes, the list is subject to change. Drugs may be added or removed at any time.

where can I get my prescription medications?

More than 61,000 pharmacies are part of our nationwide FLRx Pharmacy Network, including all national chain and most independent pharmacies. Just show your ID card at any participating pharmacy and they will fill your prescription. A list of participating pharmacies in your area is available on our Web site.

specialty pharmacy

Specialty pharmacies are experts in handling and distributing specialty medications. The national specialty pharmacies CuraScript Pharmacy and OptionCare Specialty Pharmacy participate in our network. There are some local/regional specialty pharmacies that can also be used. A complete listing of these pharmacies is available by calling the FLRx Pharmacy Help Desk or on our Web site.

are there any restrictions on coverage?

Some covered drugs may have additional requirements or limits for coverage. If a drug has requirements or limits, it will be noted in the formulary. They may be covered if your doctor shows that you meet the medical guidelines for the drug and gets approval before you get your prescription filled.

coverage requirements or limits may include:

- **prior authorization**
There are some drugs on the formulary that need prior authorization, which means they need approval before you can fill the prescription. If you don't get approval, the drug may not be covered.
- **step therapy**
Some drugs on the formulary are covered only after you have first tried another drug to treat your condition. For example, if Drug A and Drug B both treat your condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work, we will then cover Drug B.
- **specialty drug benefit**
Some drugs need to be purchased at a participating specialty pharmacy in order to be covered. If you don't purchase them at a participating specialty pharmacy, the drug may not be covered. These drugs are listed on the formulary. The first time you get a new prescription for a specialty medication, you may have it filled at any of our participating pharmacies. A complete listing of participating specialty pharmacies can be found on our Web site.
- **over-the-counter drugs**
The Child Health Plus benefit allows coverage for Medicaid-approved over-the-counter drugs.

- **quantity limits**

For certain drugs, we limit the amount of the drug that we will cover. The amount of drug we cover is based on Food and Drug Administration approved guidelines.

- **initial fill**

The first time you fill a prescription for a new medication at a retail pharmacy, you will be allowed up to a 30-day supply. This is so you can be sure that the medication works for you. If the medication does work for you, all your future refills can be filled up to the maximum amount allowed by your benefit.

key:

UPPERCASE – Brand name medication

lowercase – generic medication

PA = Prior Authorization required

QL = Quantity Limit applies

ST = Step Therapy required

MS = Drug must be purchased at a participating FLRx network specialty pharmacy for coverage
